TEST LOG FOR PERIODIC INSPECTIONS & TESTS FOR HYDRAULIC ELEVATORS

ASME A17.1 requires periodic tests on various types of elevator equipment. Owner is responsible for all required tests. Some tests may not be applicable; mark them in the appropriate column with "N/A".
Safety test tags are still to be affixed to the appropriate equipment as required by code. A test log is required for each elevator.
Enter test dates (mm/dd) and name of company performing test in the appropriate test column in the year tested.
Include pressure relief setting with date in appropriate column.

State ID #

*Equipment test tags required to be on equipment

Operating Permit Date

Firefighter's Operation

Type of Test	1 *Car & Counter- Weight Safeties (When Provided)		2 *Car & Counter- Weight Governors (When Provided)		3 Cylinder Leak Test	4 Terminal Speed Limiting Device	5 Standby Power Operation	6 Flexible Hose Fittings	7 Phase 1 & 2	8 Smoke Detectors	9 Power Door Operation	10 Unexpose d Portions of Pistons Water Hyd	11 Pressure Vessels	12 *Oil Buffers (When Provided)		13 Final & Normal Limits	14 Door Closing Force	15 *Relief Valve Setting	16 Door monitoring System
